

Cochran School of Nursing: Campus Climate Survey: Fall 2018 & Spring 2019

This is a survey of the incidence of certain types of sexual and physical experiences in relationships on campus. The questionnaire takes about 20 minutes to complete. Your participation is voluntary, and you may choose to skip questions or stop responding at any point. However, your cooperation would be greatly appreciated and would contribute to our understanding of a very important aspect of student life at CSN. We are committed to ensuring a safe, healthy, and nondiscriminatory environment for our students and your participation in this survey will help us in our work to keep all students safe.

If you agree to participate, you can be assured that your responses are completely anonymous. Your responses will be reported in terms of groups of students rather than as individual cases. You may stop your participation at any time, or choose not to answer particular questions without penalty. Some of the questions will ask about sexual and personal information. Some individuals might experience emotional discomfort while answering some of the questions. At the end of the survey you will be given information about resources should you wish to talk with someone further.

We will not report any group data for groups of fewer than five individuals that may be small enough to reveal identity. Instead, the researchers will combine the groups to eliminate any potential for identifiable demographic information.
